

Built with you. Getting better every day.

One platform. Every tool you need to run your operation — from invoicing to financing, routes to debtors.

Hey Carriers,

You may have noticed things looking a little different on the platform over the past few days — and yes, it's real. We quietly rolled out **Movik OS 2.0**. To those who ran into early hiccups along the way: thank you for your patience and for flagging them right away.

We moved fast because we don't build Movik in a vacuum — **we build it with you.**

Our goal is simple: help you stop juggling five different apps just to run your daily operations. Here's what we've built together:

* FEATURED IN OS
2.0

Invoicing & Collections — without financing

At Movik, you only finance what you truly need. That's why we've enabled Invoicing & Collections as a standalone service — activated directly from your load submission. **Movik acts as your collection agent**, handling billing and follow-up so you can focus on moving freight. Once funds are received from the broker or shipper, we transfer them directly to your registered bank account.

We invoice for you

Movik sends invoices to brokers and shippers on your behalf.

We collect for you

We follow up and manage collections — no chasing payments.

Funds go to you

Transferred directly to your registered bank account.

- Available directly from your load submission flow
- Zero financing required — use it standalone
- Eliminates administrative burden of billing & collections
- Funds routed directly to your registered bank account

DASHBOARD

Operations Dashboard

Fleet planning in real time. Monitor weather events affecting major routes and track the live status of every truck in your operation.

HIGHLIGHT

Start now: Add your trucks in the **Fleet** section to activate this feature. A document repository for truck paperwork is coming shortly.

- Real-time weather visibility on major routes
- Live status tracking for every truck
- Fleet section ready for your truck data
- Document repository — coming soon

ROUTE PLANNER

Route Planner + AI Co-Pilot

Build routes with fuel estimates, truck stop recommendations, and AI-powered guidance for every trip.

HIGHLIGHT

Our AI Co-Pilot communicates in **English and Spanish** — whichever works best for you.

- Route building with fuel cost estimates
- Truck stop recommendations along every route
- AI-powered guidance for every trip
- Fully bilingual: English and Spanish

DEBTORS

Debtor Management

Search, evaluate, and manage debtors with integrated credit insights that help you make informed decisions about every load you accept.

- Search debtors instantly
- Evaluate credit risk with integrated insights
- Manage all debtor information in one place
- Make smarter, more informed load decisions

FINANCING

Financing

Monitor funding activity, revenue, credit utilization, and carrier verification — all in one view. Movik OS 2.0 now lets you download reports in PDF and Excel.

- Monitor all funding activity at a glance
- Track revenue and credit utilization
- Review carrier verification status
- Download reports in PDF and Excel

Everything works together in one platform — designed to help **you** move faster and operate more efficiently.

Keep the feedback coming. Log in, test it out, and tell us what you love, what broke, and what we should build next. We are all ears.

Thank you for being part of Movik OS,

The Movik Team
